

Skin care while sleeping

A cosy and soft surface, composed of the most delicate and exquisite materials, hand-sewn by tuft and needle for a pleasant and sound sleep. Contains Hydra+ probiotics. These are able to migrate from the mattress to the skin improving firmness, elasticity and signs of fatigue.

More than 4500 pocketed springs, distributed in 3 layers, which reduce pressure and necessary movements to change posture.

100% Natural latex. Elastic, soft and responsive firmness for great adaptability.

Merino wool. The best natural insulator that is able to maintain the body temperature constant and avoid thermal variations.

Hydra+. Fabric enriched with probiotics to reduce the visible signs of aging repairing skin collagen (more info at www.senttix.com/es/hydra+) and **D-Stress.** Carbon thread to eliminate the static electricity.
