

## Plush comfort, firm support and enriched with probiotics

Enjoy a plush top layer, comfortable and cushioned materials, as well as an eventual firm and resistant support afterwards. Thousands of nano pocket springs on the pillow top that allow sleeper to move freely. Contains Hydra+ probiotics that migrate from the mattress to the skin improving firmness, elasticity and signs of fatigue.

**More than 4,500 pocketed springs**, distributed in 3 layers, which reduce pressure and necessary movements to change posture.

Pillow top filled with **two nano-spring layers** that ensure the right bounce and smoothness. Preserving the breathability at all time.

**D-Stress**, fabric knitted with conductive threads to protect against static electricity shocks.

**Hydra+**. Fabric enriched with probiotics to reduce the visible signs of aging repairing skin collagen (more info at [www.senttix.com/es/hydra+](http://www.senttix.com/es/hydra+)).

## Mattress

<b>Firmness (1-10)</b>	4
<b>Thickness</b>	30 cm. Slim option: 27 cm
